### **Comments and suggestions**

It was really helpful to understand and investigate into Kernel linux and driver development. The implementation of an example driver is a great idea but It would be interesting to give data sheet about the device/communication. Perhaps, serial communication is obvious for many of your students.

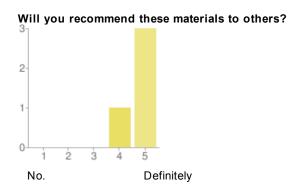

1 - Too short.	0	0%

3	3	75%
4	0	0%
5 - Definitely too long.	1	25%

Comments and suggestions Great!

I like the evolution of level of details in labs: the first lab is really explained step by step while explications for the last one are small.

### **Comments and suggestions**

a very good point on this formation is the presence of the practical labs between each lectures. the rhythm is

1 - Too difficult.	0	0%
2	0	0%
3	2	50%
4	2	50%
5 - Too easy.	0	0%

they were a little bit too easy but make them harder will probably make them too long too. the level is high and the prerequisites must be worked before the training, but all of this is bearable.

Was enough time dedicated to practical labs?

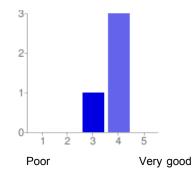

1 - Not enough time	1	25%
2	0	0%
3	2	50%
4	1	25%
5 - Too much time	0	0%

Not enough timeToo much time

How do you rate training conditions (room size, equipment, environment)?

1 - Poor	0	0%
2	0	0%
3	1	25%
4	3	75%
5 - Very good	0	0%

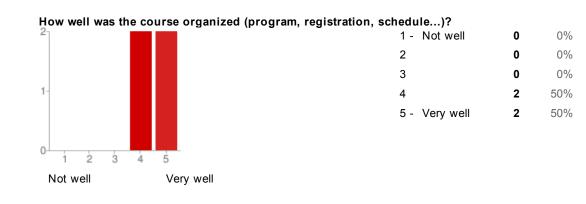

A little bit noisy, ceiling light were not appropriate. (but It is not your fault) the training conditions were more of valeo responsability. the materials furnished by free electron for the labs (CALAO) were good and easy to manipulate.

1 - Poor.	0	0%
2	0	0%
3	1	25%
4	1	25%
5 - Very good.	2	50%

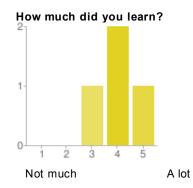

### **Comments and suggestions**

training computers were valeo or personal ones, this is more of valeo responsibility

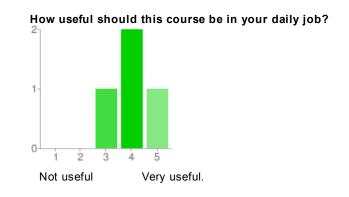

### **Comments and suggestions**

The on-the-fly modifications were really appreciable.

1 - Not much	0	0%
2	0	0%
3	1	25%
4	2	50%
5 - A lot	1	25%

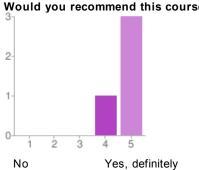

As expected! very complete training

1 - Not useful	0	0%
2	0	0%

4	2	50%
5 - Very useful.	1	25%

### **Comments and suggestions**

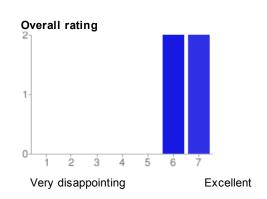

It should be useful, wait and see! this training is not really related to my daily jobs for the moment, i did it to be able to switch to embedded linux projects soon

1 - No	0	0%

2		0	0%
3		1	25%
4		0	0%
5	- Yes, definitely	2	50%

### Comments

Yes but I have a lot to do. i would be interested in IPC, SMP, network distributed applications for embedded targets (arm cortex A9, blackfin, tricore)
