Not enough time to see application part. dommage Not enough time to see application part. dommage labs are sometimes a bit long. They could be shorter if more precisely directed not to let us search too long for solutions to some basics need (like .mk files options or syntax issues).

Sometimes more details or even the correction for the exercises could be useful It's too messy to have example useful. It's too messy to have example useful. Something like an index or a quick reference is missing (during the labs, we could refer to reference instead of digging into the slides)

We had one issue with a exercise (same for every one) and we spend to much time to fix it. The instructor didn't know this problem. We had one issue with a exercise (same for every one) and we spend to much time to fix it. The instructor didn't know this problem. Questions were clearly answered. Speaker goes a bit to fast and monotonic like a recitation. He's a very a good speaker but his teacher skills can still be improved.

First Android compilation need a lot of time, this time should be used for anything else. This course subject is very wide, so it's hard to fully understand all the details. In only 4 days is not enough and the covered subject too wide.

What part(s) of the course did you like most?

Missile launcher :-)
labs

What part(s) of the course did you like least?

having the speaker speaking fast while displaying the slides

Porting Android to a custom made board from scratch instead of using a clone-config of a board that is already supported by Android yes, anything interesting in this field of knowledge the training was well but the compilation time was very bad the training was well but the compilation time was very bad -
