N/A Would be easier to follow if vocal from instructor was more in sync with visual i.e. the slides. I read before most of the embedded android book but without it I would be lost. It is a lot of information, 400 slides. lecture materials contains lots of hints to complete the lab = at some point, it can be highlighted (in the slides)

very difficult but it's challenging, all the time you need to find it your self i think that how it's made. Excellent choice of lab exercises. I think the materials could be improved. Solutions or check lists could be added when someone is lost with their efforts. It should not be necessary to google for solutions.
