Summary

How did the course meet your learning objectives?

1	0	0%
2	0	0%
3	0	0%
4	2	25%
5	6	75%

Comments and suggestions

Very interesting topics, fast paced but thorough.

Not being a real programmer I couldn't keep the pace in none of the labs, nevertheless the aim to have a complete overview of the steps and the tools needed for the integration of custom hardware into Linux was fully achieved.

How was the duration of the course?

2	1	13%
3	7	88%
4	0	0%
5	0	0%

Comments and suggestions

Having this course on-site is great but I wish we had it off-site to avoid IRQs from management.

How useful was the lecture document?

Was the instructor helpful with practical labs?

1	0	0%
2	0	0%
3	0	0%
4	1	13%
5	7	88%

Comments and suggestions

Would it be possible to have a course quoted with learning material included. I.e. participants would be left with the gear (estimate cost around 100EUR).

How useful were the training labs?

1	0	0%
2	0	0%
3	0	0%
4	4	50%
5	4	50%

Comments and suggestions

From my viewpoint the "reverse engineering" of the labs solutions together with the slides and the lab book are the main road to eventually get full advantage of the course.

Given the limited time available, it was mandatory to follow instructions in the Lab Book sometimes without a full understanding of the steps

How difficult were the training labs?

1	0	0%
2	0	0%
3	6	75%
4	1	13%
5	1	13%

Comments and suggestions

should add some optional "advanced" tasks for who has spare time at the end of the regular session

As I said I don't have (yet?) the needed programming experience.

Was enough time dedicated to practical labs?

Comments and suggestions

I think that could be added more optional labs, to allow the slower to finish the exercises. Once somebody start to be late with one exercise is difficult to get alined with others again.

How do you rate training conditions (room size, equipment, environment)?

Comments and suggestions

(supplied by us...)

Our company could invest in having a room without loud fans and crap. The computers provided (by our company) were outdated years ago (Core 2, 1.5GHz, 2GB takes a looong time to compile the kernel.

5	1	13%

Comments and suggestions

For the moment it was great to have background information on how the Kernel works, since we do not do driver development but mainly write User space applications.

What part(s) of the course did you like most?

All parts were enjoyable. Debugging was impressive. We need time to digest all the information given.

Kernel debugging tools device tree structure explanation

What part(s) of the course did you like least?

Consulting in technology selection and methodology	1	13%
On-site development, support and consulting services	2	25%
Not interested	1	13%
Other	0	0%

Comments and expectations

- We might in the future be interesting in other training (Android, buildroot)
- The knowledge of FE instructors are impressive. It would likely make sense to have FE involved in our linux development (project start and kickoff, some in-house development followed by technical asisstance).
- Trainer really skilled; lab book might need more detailed references to documentation

and todo lists.
