Lots of information, and understand a lot better how things work behind the scene.

More labs would be better. A lot of ground was covered and being able to do labs along with it would be helpful.

How was the duration of the course?

Too short.: 1	0	0%
2	0	0%
3	7	100%
4	0	0%
Definitely too long. : 5	0	0%

Comments and suggestions

Covering so much information in these four days are just fine. However, if there is a duration, let's say like after two days, the student can review the material before moving on, it may be better.

How useful was the lecture document?

Not useful.: 1	0	0%

3	0	0%
4	3	42.9%
Very useful: 5	4	57.1%

Comments and suggestions

With the practical lab, a good chance to review what the instructor has covered.

	3	1	14.3%
	4	3	42.9%
A lot of added value:	5	3	42.9%

Suggestions and comments

Keeping time for more questions or prompting the class with questions to check their understanding would be a good idea. It would be better to cover less material but go more in-depth with labs would be more impact-ful. Could probably cut down on buildroot internals a bit.

Instructor provides much more detail and examples to complement the written materials.

 4 **2** 28.6%

Too difficult: 5 **0** 0%

Comments and suggestions

The labs is a bit difficult to me, my group(2 of us) have done 70% of them. There are many detailed steps, if we made a typo, it will take more time. Sugeestion: provide the answer in a different folder for each step. This will help people to learn even if they cannot complete the labs by themselves.

Was enough time dedicated to practical labs?

Definitely not enough: 1 **0** 0%
 2 **2** 28.6%
 3 **3** 42.9%
 4 **2** 28.6%

Definitely too much time for labs: 5 **0** 0%

Comments and suggestions

Not enough for me, but maybe enough for other people who use build system on

daily basis. So I suggest to provide lab answers, thus people like me can also follow.

A lot: 5	3	42.9%

Comments and suggestions

Again, if student can have a review session themselves in the middle (like two days of

the training), student can review what they learn and ask follow-up question if any.

Comments and suggestions

Need breakfast and lunch (maybe more a suggestion for our own company) :)

What part(s) of the course did you like most?

Good knowledgeable instructor, good labs with the beaglebone black

autoconf tools, packing

A lot of useful information that everyone on our team should know.

What part(s) of the course did you like least?

duration per day was too much, should have been maybe 5-6 hours
