I would have just wanted a bit more detailed information about differences between fastboot/Little Kernel and uboot.

Good content, well detailed, in line with my expectations

Very good trainer

How was the duration of the course?

Comments and suggestions

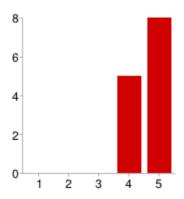

But not enough short interruptions during the day (might help to work more efficiently)

The duration is fine with enough free time to put notions into practice

Quite dense!

long but necessary to understand weell

C'est ce qu'il fallait pour mettre en oeuvre

Difficulty well adjusted, we have to think about what we are doing, but we can rely on the training material

ok

Just our (company provided) laptop PC rebooted several times during the toolchain build, because of temperature...

Room too small and overheated, not enough space for all the equipment on the table Room too small, not enough space to work, to much hot in the room.

Better ventilation would be good.

Maybe in the future, but useful to have a better comprehension of bootloader, kernel, ...

What part(s) of the course did you like most?

The bootloader/uboot part as well as the file systems one

L'ensemble

Filesystem, bootloader, linux kernel, flash part, crosscompile

4 first day

bootloader -> kernel startup sequence...

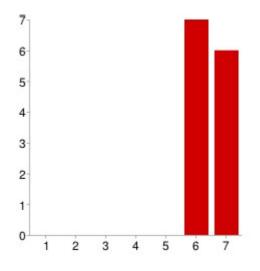

Watching your custom kernel boot on the card for the first time :)

What part(s) of the course did you like least?

the last

Learning how to build a system and integrate libraries without Buildroot: work is too repetitive and does not give new information after the first example.
