Comments and expectations

The amount of information taught during the course is quite important, making it difficult to fully take in in only 5 days. Obviously, the difficulty of the different practical labs depends a lot on the participants' prior knowledge (which of course you don't have any control over). The Linux driver subsystem is a bit difficult to fully comprehend. The labs help a lot to get a better understanding of the subsystem through empirical exercises, but the course slides could be reworked a bit to be more pedagogical. In other words: without the trainer, it's pretty much impossible to understand the concepts (IMHO).
