it could have been great to work on a lib exported in sysroot and make an app relying on it to understand the sysroot usage

Training coverage is very good as we just had basic notions on Yocto.

computers were provided by our entreprise

About the hardware board used : Maybe a board easier to flash with a tool or a one command instead of having to copy to emmc or having to setup nfs would be better.

Computers were delivered by our company.

What part(s) of the course did you like most?

the app, distro, and the generation of new kernel with specific config

What part(s) of the course did you like least?

the BSP part, as I feel less concerned in my day to day job, and I feel like I don't understand all the details except it creates a new arch
