| very close to my day to day work |
| first approach of yocto, maybe the end of training (day3) too complex for newbies need more pratical for a better understanding |
| i needed an overview about yocto and i get what i need |
| I am newbies in Yocto and well now Android build system. Training is well adapted to my profile. |

good duration
i would propose to add one day to the training session
as build time is long, there are some "long pauses" where you wait for others or where you just wait your build
