Practical lab trainings have been very good and very well organized. A little bit more focus on application development including hardware interfaces like SPI would be nice.

Please tell us why you need or don't need paper printed materials

It was easier to look at the electronic versions. Better searching and copy/paste is available. for most information you want to find the electronic format is as usefull as the paper format. For the practical lessens the electronic format has even the advantage to have better access to same comand line entries (copy and paste). The main advance of the paper is that it is possible to check the conentent of different pages in parallel.

Comments and suggestions

Should become more useful in future, as projects with adaptive AUTOSAR are starting.

Even if the course was really interesting and useful, at the very moment, the content of the course is not needed for my actual work. But in the future it is possible, that I need it.
