How was the duration of the course?

10 responses

Comments and suggestions

3 responses

Schedule of the course was pretty bad for me so it made it feels it was a bit long.

or too short if demo were to be done by participants

The breakdown of half days over a longer number of days was a genius move.
It gave students a better opportunity to process the material.

How useful were the training materials?

I couldn't be more than a mere listener in this course, thanks to work overlap, so material is the only thing I can rely to have real advantage of it.

How knowledgeable was the instructor?

The instructor is definitely very knowledgeable but could improve the way to deliver the material.

Excellent.

How much value did the instructor add to lecture materials?
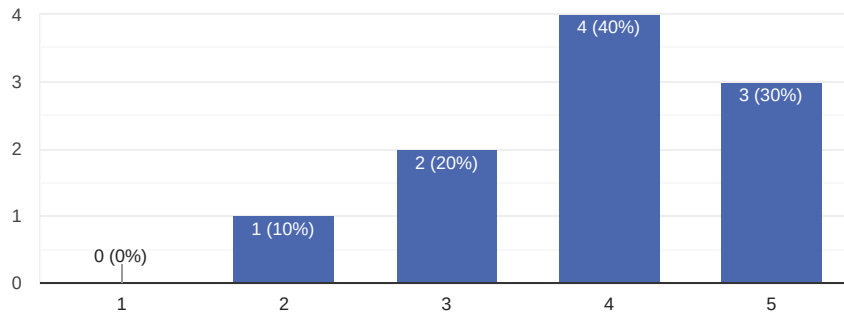

10 responses

Suggestions and comments

2 responses

The instructor is definitely very knowledgeable but could improve the way to deliver the material. For example, clarity in relations between the data structures.

Watching Gregory go through the though process and making the occasional mistake here and there and watching him think it through was very helpful.

How useful were the practical demos?

10 responses

Comments and suggestions

3 responses

Given that it's required a platform for labs it reduces the chances of getting properly involved in the labs, reducing the effectiveness of them.
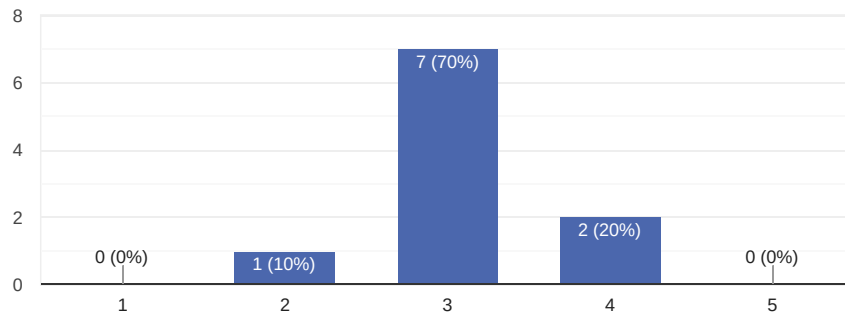

My suggestion is to remove the demos for short-duration training and replace them with code examples reviews

This was the best part.

## Was enough time dedicated to practical demos?

10 responses

How well was the course organized (program, registration, schedule...)?

10 responses

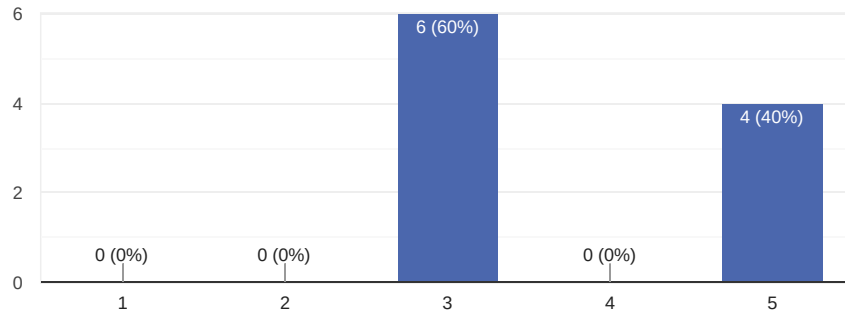

Comments and suggestions

2 responses

the time of the day was really bad for me, so it's unlikely I'll be able to participate in other course.

Very methodical. The progression from registration to prep to the actual class made sense.

How much did you learn?

How useful should this course be in your daily job?

10 responses

Comments and suggestions

1 response

I'm afraid my workplace doesn't let me practice this knowledge.

What part(s) of the course did you like most?

5 responses

Driver developpement

Demo

Developing the input driver

All

Probably the demos and Gregories though process.

What part(s) of the course did you like least?
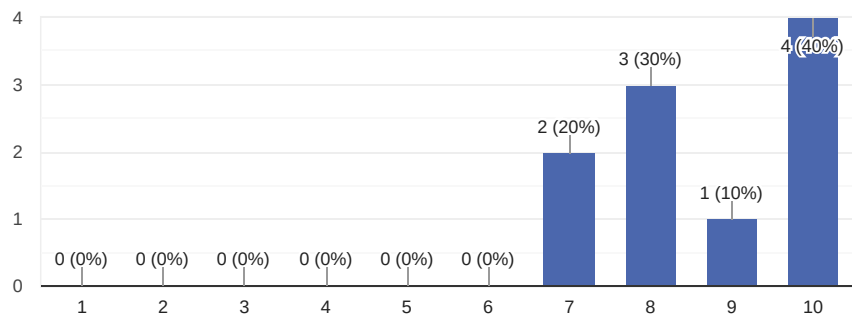

3 responses

n/a

Demos

The manual is very good but there were a couple of places where something might have not been emphasized and led to some backtracking. This is why the demos were so helpful.

Overall rating

## Comments and suggestions

2 responses

It digs into topics that I didn't see hinted in 3 different courses of linux kernel from the Linux Foundation, thanks to be closely related to embedded system development.

Maybe recording of the demo would be useful

Further training needs?
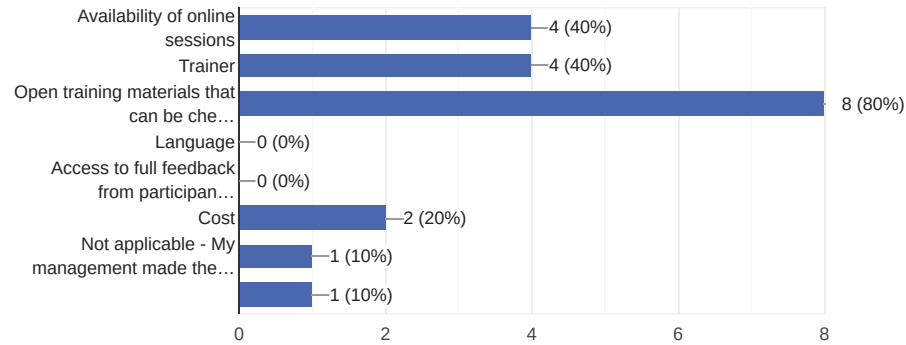

10 responses

Comments

3 responses

Well I have already joined the graphics training :-)

For the moment I have no needs but will surely o to bootlin if needed

I will be at some point. Not now though. I need to integrate what I've learned.

What reasons prompted you to choose Bootlin?

Please, use Zoom for video conferencing. There are lot of problems with your own meeting tool, starting with poor bandwidth management(video feed priorities) to inability to properly work with some bluetooth headsets.

Nothing for the moment. Thanks for your valuable trainings & docs.
