## How did the course meet your learning objectives?

6 responses

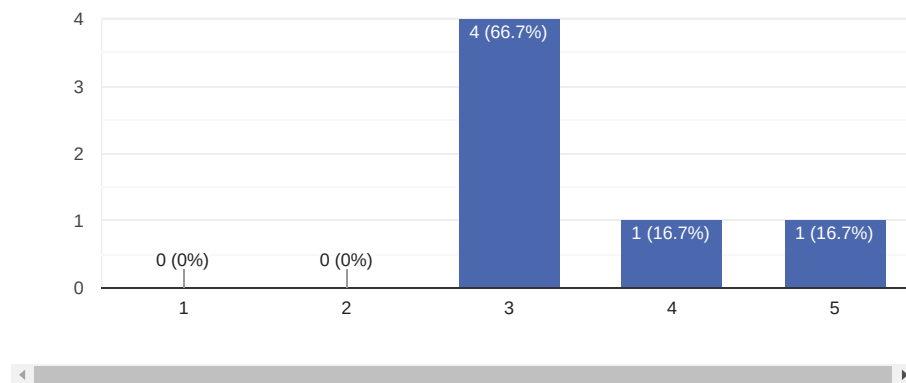

## Comments and suggestions

1 response

reat Alexandre, very competent! But I missed a lot having time during the course to make labs by myself. I think this reduced a lot the learning effect.

## How was the duration of the course?

6 responses

## Comments and suggestions

### How much value did the instructor add to lecture materials?

6 responses

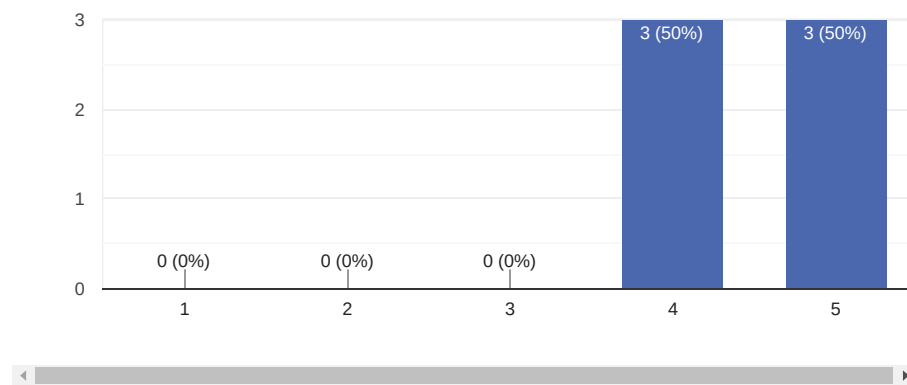

### Suggestions and comments

0 responses

No responses yet for this question.

### How useful were the practical demos?

6 responses

### Comments and suggestions

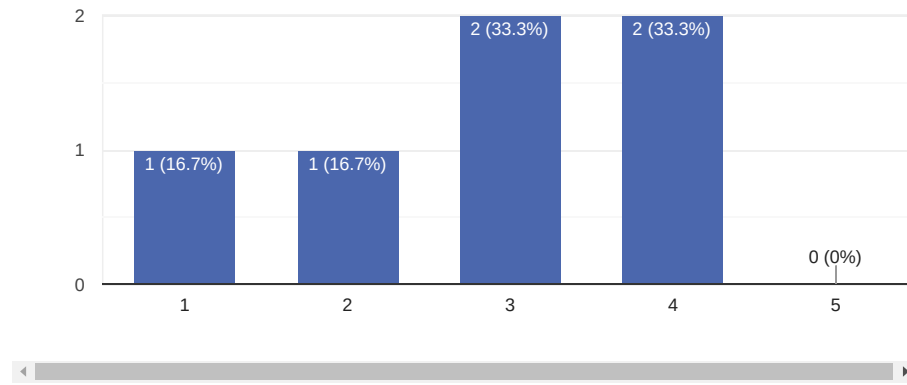

1 response

I would have preferred doing the assignments myself without them being shown first.

### Was enough time dedicated to practical demos?

6 responses

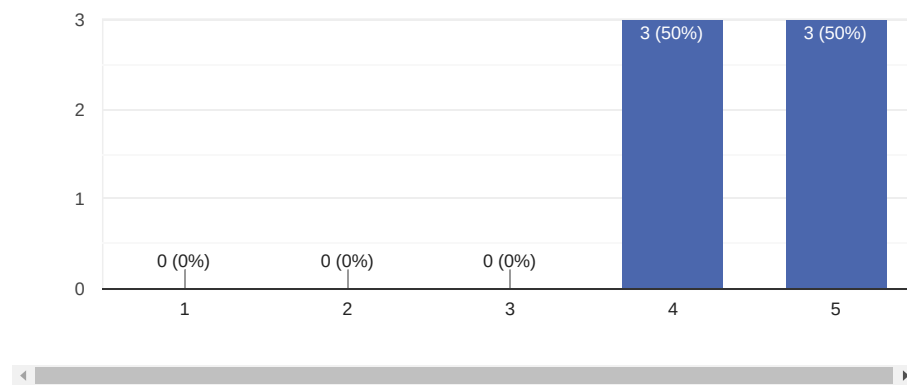

### Comments and suggestions

### How well was the course organized (program, registration, schedule...)?

6 responses

### Comments and suggestions

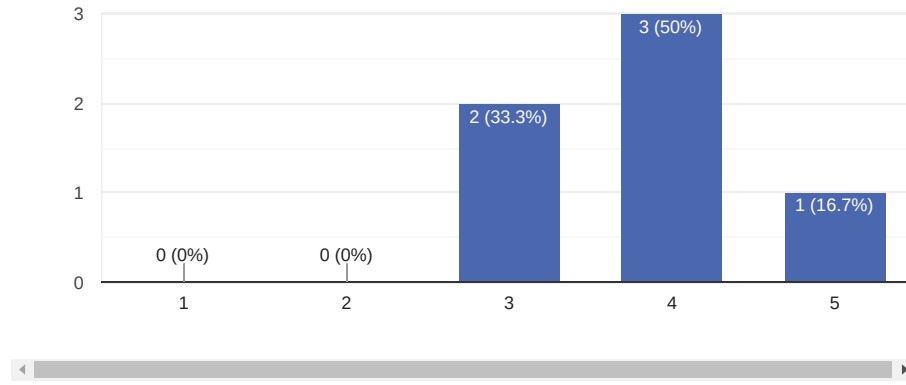

1 response

always the same problem: missing time for labs

### How much did you learn?

6 responses

### Comments and suggestions

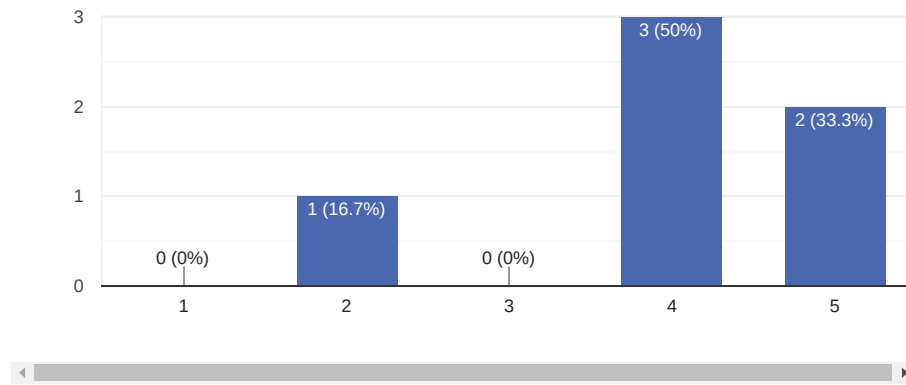

2 responses

I already had quite some experience with the topic

Since I did not had any experience with Yocto before, I could not record all of the information taught in the course. If I would had worked with Yocto before I could have learned even more.

### How useful should this course be in your daily job?

6 responses

### Comments and suggestions

No responses yet for this question.

### What part(s) of the course did you like most?

1 response

It was quite comprehensive, I appreciate that it covered every part of the topic I was interested in.

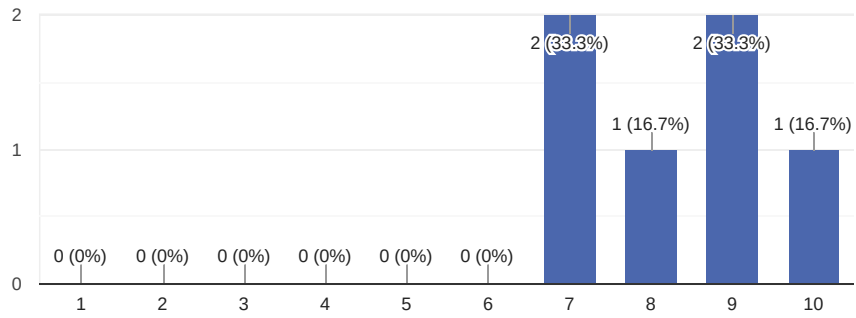

### What part(s) of the course did you like least?

1 response

Some (small) parts seemed way too specific and low-level and probably confused less experienced participants.

### Overall rating

6 responses

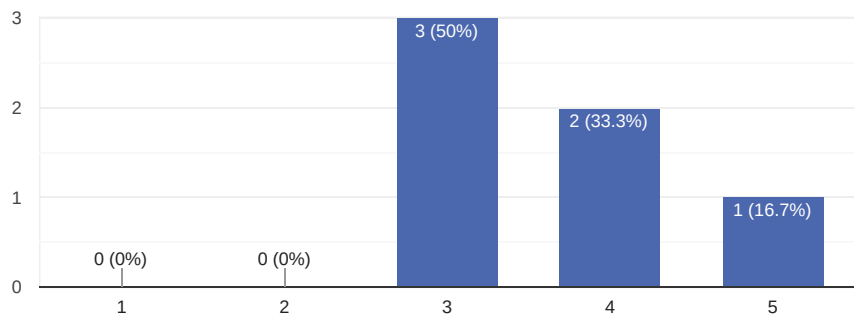

### Comments and suggestions

1 response

Since I did not had any experience with Yocto before. I would have appreciated if there would be more slides that give a short overview of the relevant layers and which layer we currently talk now. In order to always have the big picture at hand.

### Further training needs?
