Would have liked a more in-depth example of creating a device driver. But I realize there is another course on device drivers.
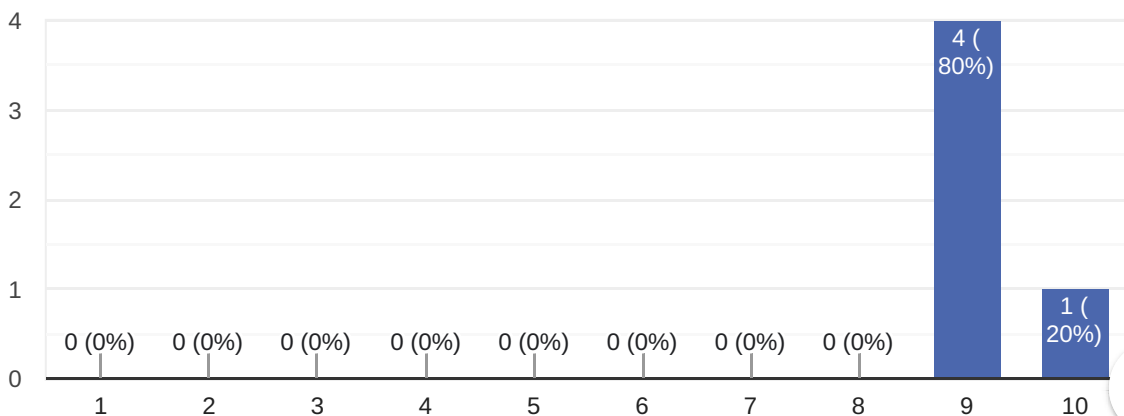

I think getting sample HW for the labs would be better to do up front - it was a little hard to watch the instructor doing the labs

I was very happy with the course and learned a lot

How useful were the lectures?

They'd be more useful doing in parallel, which I'll do now after the course ended

They were not as helpful as doing the demos myself.

Watching someone do the lab isn't as effective as actually doing them yourself.

How would you rate the overall organization of the course?   ⧉ Copy

I think I have a good preview of what is out there.

What part(s) of the course did you like most?

4 responses

Device tree semantics

Q&A w/ the instructor

practical demos

It was a good refresher, material was well organized and presented.

What part(s) of the course did you like least?
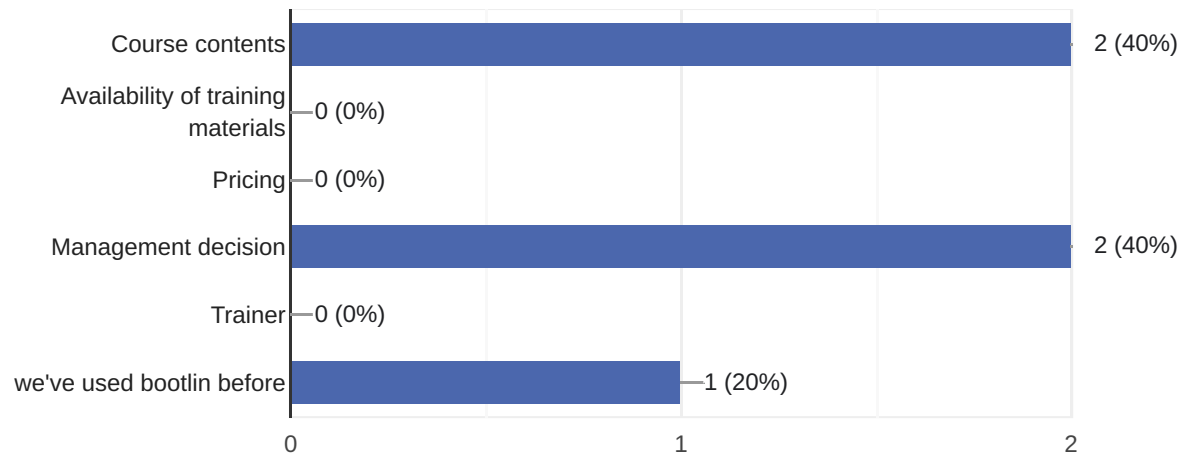

3 responses

I appreciated everything presented

going through the labs - hard to catch all the details

It's too bad that students going through the labs was an extracurricular activity.

What reasons prompted you to choose a Bootlin course?
