Top, peut-être plus de switch entre TP et diapo pour rester actif (éviter 3 ou 4h de slides d'un coup)

prévoir d'écrire des scripts en début de formation pour automatiser les opérations fréquentes tout au long de la formation (untar dossier src/dossier dest), des fois on se perd avec tous les path utilisés lors des TP

Dense (point positif)

### How useful were the lectures?

### Comments and suggestions

1 response

Très complet

### How useful were the practical labs?

6 responses

### Comments and suggestions

2 responses

Excellent, permet très concrètement de comprendre la compilation et l'assemblage des différents outils/programmes.

Refaire certaines opérations plusieurs fois permet de bien comprendre et d'acquérir des automatismes.

Very good for understanding better the lectures, but sometimes we stumble into unexpected faults

### How would you rate the overall organization of the course?

No responses yet for this question.

### How would you rate the trainer?

6 responses

### Comments and suggestions

2 responses

Agréable à écouter, répond aux questions variées

Very good lecturer, very helpful and proactive during the labs

## How did the course meet your learning objectives?

6 responses

## Comments and suggestions

2 responses

Réponds aux attentes, comble les lacunes et apporte les réponses à toutes les questions que j'avais.

The course is very intensive, that's a lot of information for someone who doesn't come from the Linux world

## What part(s) of the course did you like most?

4 responses

bootloader, kernel booting and debug application

Toolchain, licensing, devicetree

cross-compiling, buildroot

The lecture and added info from Michael

### What part(s) of the course did you like least?

4 responses

yocto

-

systemd, yocto

We got stuck several time during the labs and had to call Michael for help, which was a little frustrating at times

### What reasons prompted you to choose a Bootlin course?

6 responses

### Comments

2 responses

Répond exactement à mes attentes, a été l'occasion pour moi d'obtenir des réponses à mes questions.

Pas de remarques particulières: Peut-être évoquer plus des situations/problématiques concrètes spécifiques au développement Linux pour l'embarqué.

Thank you very much Michael !

### Further training needs?

2 responses

- Yocto

- Linux Kernel & Drivers developpment

boot time optimisation, remote debugging of bare metal applications
