Sometimes the slides were moved to fast, but I was able to go back and catch what I missed.

How useful were the practical demos?

4 responses

Comments and suggestions

They could be more interactive, with some tasks for the participants. Everything was well explained, but some practical exercises would be helpful.

Some of the demos were really good and showed some very common debugging steps.

How would you rate the overall organization of the course?

How did the course meet your learning objectives?

4 responses

Comments and suggestions

1 response

Was hoping for some more debugging of common failures but my use of yocto is different than most.

What part(s) of the course did you like most?

3 responses

Conditional build because most important, debug strategy

Overall I enjoyed the whole course.

the Practical demos

What part(s) of the course did you like least?

3 responses

Maybe we spent too few time on how use Automating layer management

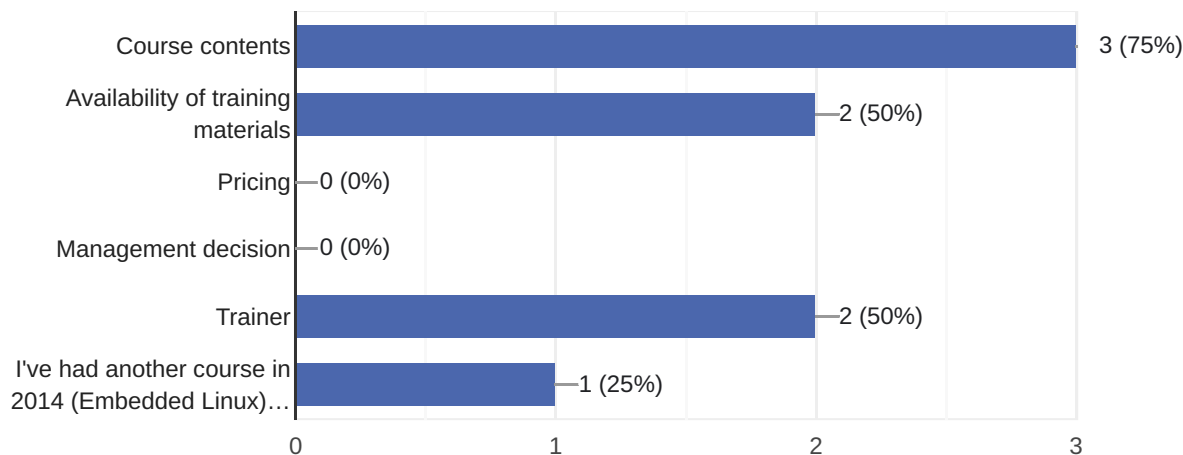

There was not really anything that I did not enjoy about the course, except maybe having issues calculating the time zones and showing up too early on the first day

the long term explanation of the materials

What reasons prompted you to choose a Bootlin course?
