Very pleased

In general, I liked the course and definitely came out with a much better understanding of Yocto.

Pretty good training experience

I would suggest to go through the basic stuff and stuff that can be just read in the internet in a faster way and focus on the nitty gritty details also to allow more advanced practical labs.

I felt the lectures were the best part, especially when they covered pragmatic use, best practices, and general concepts. As someone new to Yocto, these segments were very valuable.

Some parts of the training felt like a little too much time/emphasis was spent on somewhat trivial things like variable concatenation/syntax that I would likely just look up later.

Very relevant to my work

Same comment as above

I felt like the labs tended to drag on a bit and were slightly tedious at some parts. The portions involving things not directly using Yocto itself (e.g. fixing build issues) felt a little too frequent and unnecessary.

In the future, providing ready-to-go VMs of appropriate Ubuntu installations might also be advisable. I recognize this was a failure on our IT's part, but it resulted in a lot of time spent debugging and working around issues with the environment.

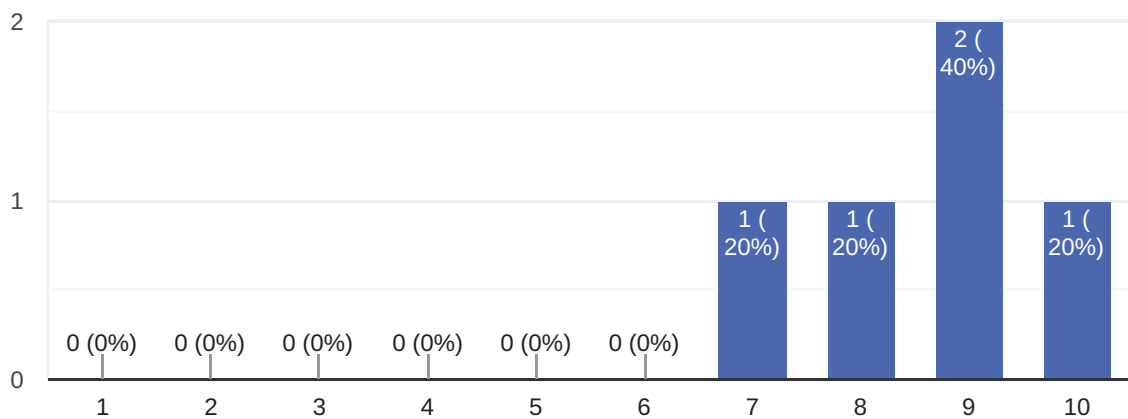

Wish to have more time to finish all labs

Maybe add to each lab a challenge in case the lab was finished quickly.

### How would you rate the overall organization of the course?

Our IT department screwed up a bit, so that slowed down things on the first day. Not our fault.

As remarked before, I think a little less emphasis could be placed on the labs and more time spending with concepts, best practices, etc. w/ Yocto.

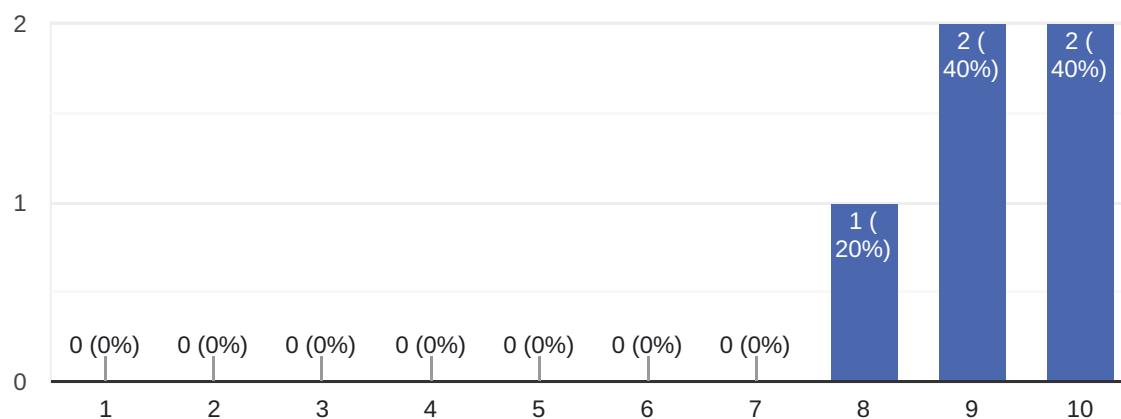

Using more examples might be more helpful

### How would you rate the trainer?

Good trainer. His first time training. So pacing was a bit slow at times. Had to rush through things a bit at the end of the last day. Otherwise he did great!

Joao was easy to follow and very knowledgeable. He was happy to perform deeper dives into specific topics and could provide practical insight into questions asked. I felt he did a great job.

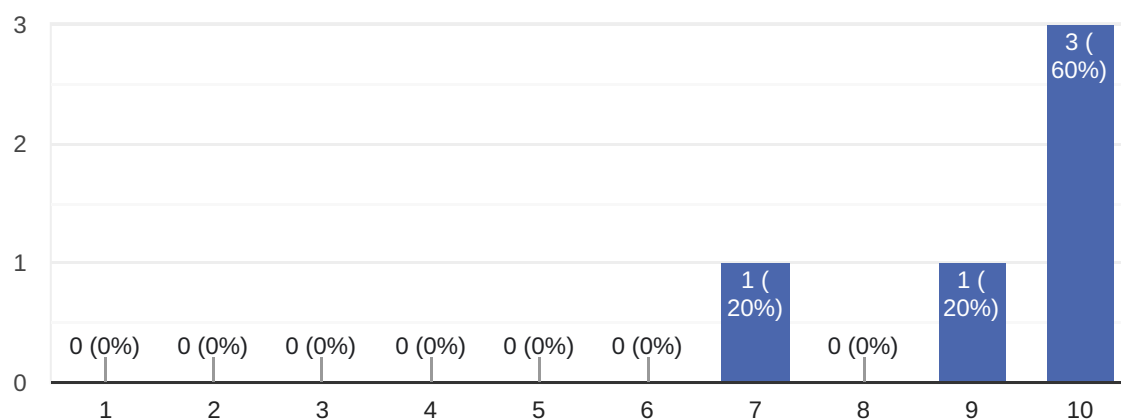

João Marcos Costa is an excellent trainer. Very patient and knowledgeable

Great attitude, very knowledgeable and always accommodating to the attendees necessities and questions

### How did the course meet your learning objectives?

Very helpful to my work

### What part(s) of the course did you like most?

4 responses

The conceptual part: I lacked the important perspective on yocto in general.

Practical "real world" examples and best practices described during the lecture.

Q&A and some very practical examples from João Marcos Costa

Practical labs

### What part(s) of the course did you like least?

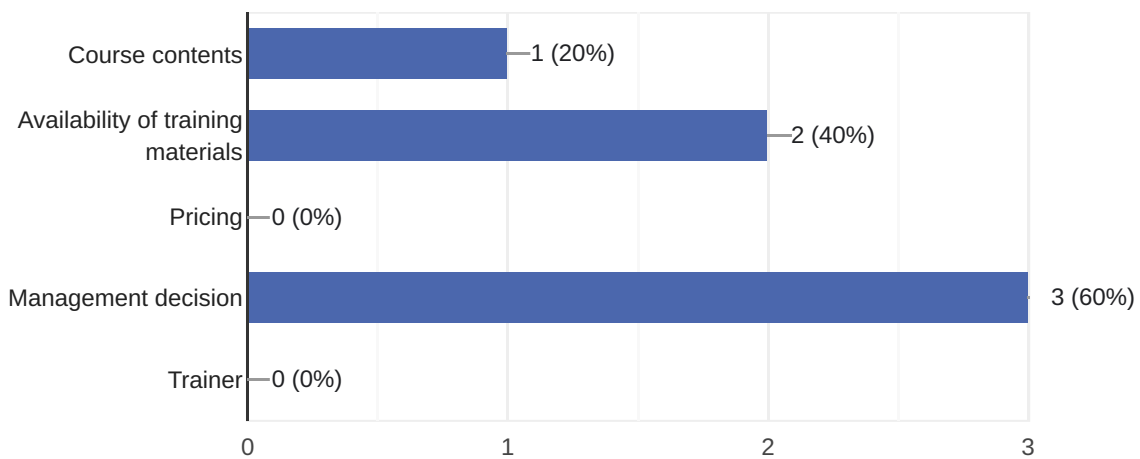

1 response

It felt like some of the lab portions took longer than needed.

### What reasons prompted you to choose a Bootlin course?
