There is too much material in this course for a 3-day course. Over 300 slides + long labs. Should be 4 or 5 days

How useful were the lectures?

Comments and suggestions

1 response

The labs are poorly described, there is not enough info as to what is expected. This meant we had to ask the instructor what we were supposed to do, which wasted time.

How would you rate the overall organization of the course?

Too much material for 3 days. Balance was ok, labs were poorly organized and described. Also we were not told which eval board was being used for the course, so we couldn't do the first download + build as requested.

How would you rate the trainer?

Good technical background but communication problems since not native English speaker.

Instructor was fantastic

How did the course meet your learning objectives?

As a yocto newbie, the course taught me everything i wanted to know

What part(s) of the course did you like most?

3 responses

Slides were well organized.

Instructors running on the board.

hand-on learning, chatting with instructor

What part(s) of the course did you like least?

2 responses

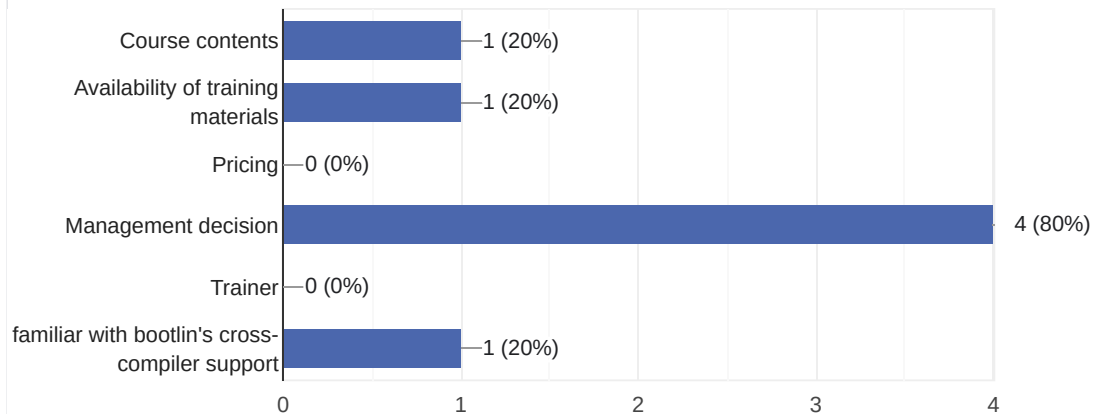

The labs were useful exercises, but very poorly described so had to ask instructor everything. There was a hardware segment with hooking up a joystick that was terribly described.

sheer volume of yocto content

What reasons prompted you to choose a Bootlin course?

Jeremie is a great teacher ! Had fun learning about Yocto :) Hope to see him and your team for future trainings.

Further training needs?

1 response

nothing at the moment
