For my current role, this course will bring a fresh view and maybe new ideas can be implemented in the future making use of these instruments.

How useful were the practical demos?

Ideally the practical demos could be in fact practical labs - but I understand that we have timing constraints. Would be great to have in person training and trainees could be in small groups.

How would you rate the overall organization of the course?

Very clear and very knowledgeable

Solid knowledge and great communication.

How did the course meet your learning objectives?

Cover all the debug objectives that i was looking for

The course length should increase. I feel we could all benefit from actual (forced) hands-on during the practical labs.

What part(s) of the course did you like most?

3 responses

Debugging and practical lessons

Training labs

Labs

What part(s) of the course did you like least?

3 responses

A huge amount of subjects on a small timeline

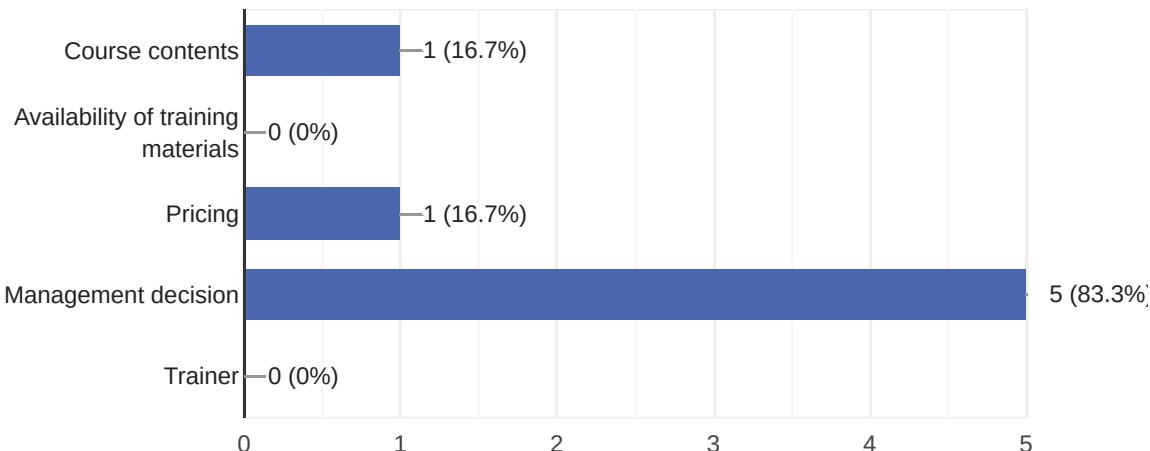

I thought that that the theory part felt too dense. Too much information in a short amount of time. Perhaps more time could be dedicated to the labs.

Theoretical part, it is massive and with lots of tools and concepts to understand.

What reasons prompted you to choose a Bootlin course?
