Want more device operation practices.

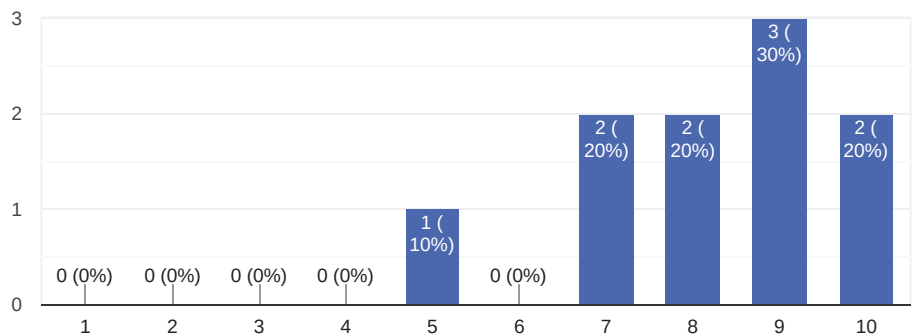

before the training, list the preparation pc environment setting including the vm and necessary files in gitlab since some time network error cannot download for git.

as I have less basic knowledge of Linux, so it's hard to catch up with teacher, so I think it's better for me to do the experiment by myself first then follow the teacher in course

## How useful were the lectures?

What part(s) of the course did you like most?

4 responses

- labs
- File System and Kernel.
- practical lab
- hardware driver development

What part(s) of the course did you like least?

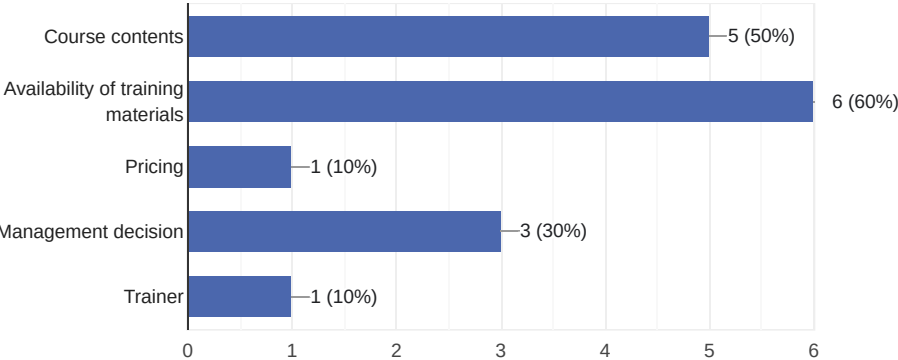

4 responses

- no enough time to do labs between course session
- Uboot
- reduce the non-use tool, highlight the necessary tool
- create the development environment, it cost too much time

What reasons prompted you to choose a Bootlin course?
