Maybe a bit to much content for 5 days.

very well organized. However, some topics like micro controller basics, different families etc could have been opted out of training course based on the target group. this time would have been utilized for introducing standard Apps in User space

How useful were the lectures?

Trainer was knowledgeable, helpful.
Knowing the target audience would have probably helped to speed up the course. I felt the 1st day was too much basics, which most of the team already knew and probably due to this in the end we couldn't complete all the content and the labs.

How did the course meet your learning objectives?

What part(s) of the course did you like most?

5 réponses

Excellent design of the course - to start for a beginner with Cross compilation, U-Boot, kernel, until building user application and debugging it

Kernel booting and init task

labs

The labs

Almost every part.

What part(s) of the course did you like least?

4 réponses

A bit more automotive specific comparisons (basically knowing the target audience) would help, as we can relate easily

User space applications

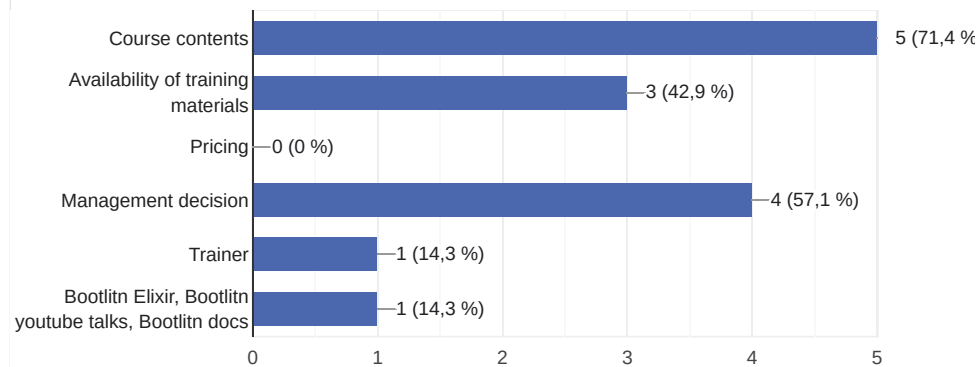

slides

Nothing that i got bored

What reasons prompted you to choose a Bootlin course?
