Being able to do the labs ourselves along with the instructor would be very beneficial.

Well worth the time.

How useful were the lectures?

The pace of the first 3 days was good and the material had a logical flow. The last two days were incredibly dense, however. And the transition from topic to topic felt jarring. It was hard to absorb.

How would you rate the trainer?

João was excellent. They had a very good understanding of the materials, answered questions thoroughly, and presented the material at a very good pace for learning.

Excellent presentation.

How did the course meet your learning objectives?

It would have been great to have a section at the end breaking down how you would start a new project, and what you would do for a distro instead of POKY. Maybe another lab?

What part(s) of the course did you like most?

4 responses

The lab walk throughs

Learning how to connect the Nintendo Nunchuck to the Beaglebone. :-)

The demos were practical and enjoyable to follow along by using nInvaders and ctris.

The demos helped put the lecture content into context.

What part(s) of the course did you like least?

3 responses

The entire last two days. My brain was fully saturated by that point. It was hard to absorb new topics.

Having to do the labs on our own and not with the instructor.

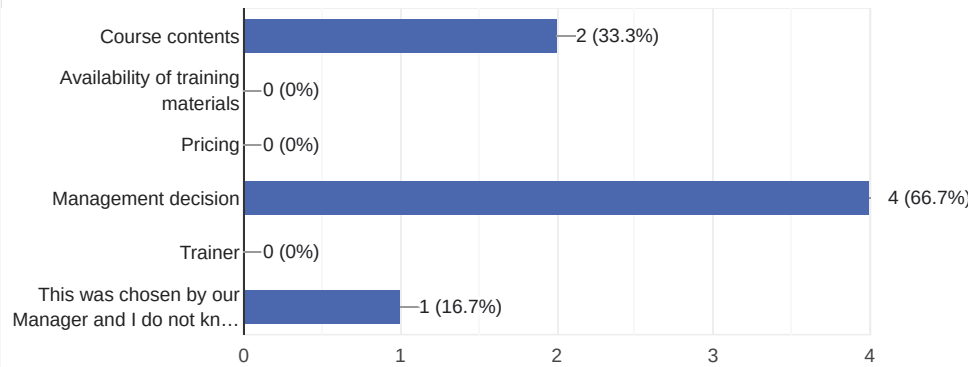

I would have preferred to do the labs hands-on during the day. I feel this would have been worth making it a longer day.

What reasons prompted you to choose a Bootlin course?
