bon rythme, découpage entre théorie et pratique excellent

Too much oriented Linux and not enough "embedded"

How useful were the lectures?

Vert good break-down of the formation

Très bon point d'entrée dans linux embarqué pour les débutants

How useful were the practical labs?

8 responses

Comments and suggestions

3 responses

I was expecting more interactions with the trainer during the practical labs in order to focus on the major parts of these labs. Also, the labs could be optimized by indicating the actions with a long waiting time (such as the 30 mins waiting time to build the kernel)

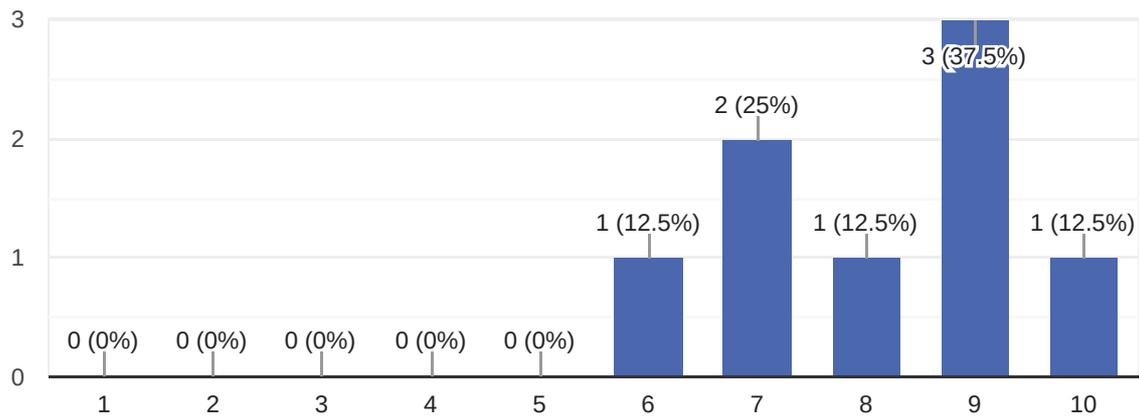

Bien expliqué, concrétise la théorie avec un unique projet à mettre en place tout au long de la formation

Guidelines too precise, not enough need to think about solution

How would you rate the overall organization of the course?

Comments and suggestions

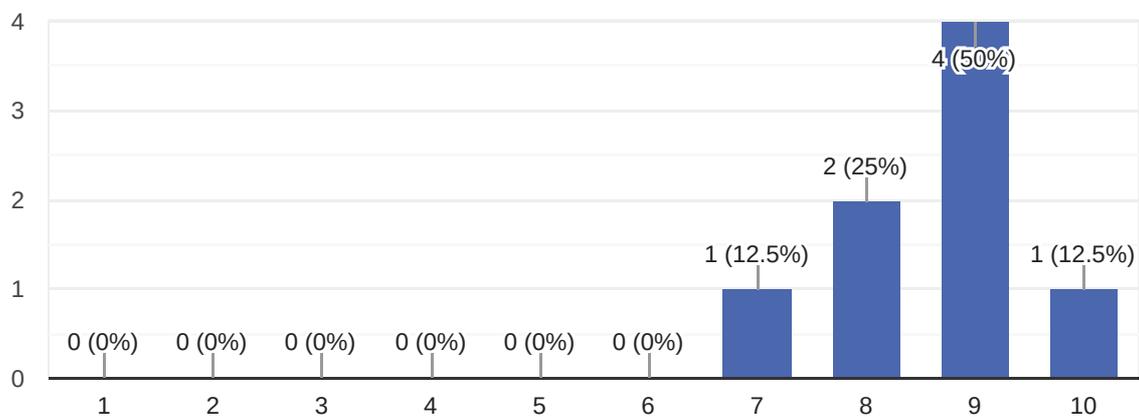

1 response

I think the labs should be a little more detail in term of instructions. Some times it references to other labs, i think it should be more explicite

How would you rate the trainer?

The instructor is very helpful and transparent. In term of technical expertise, i think he is very good

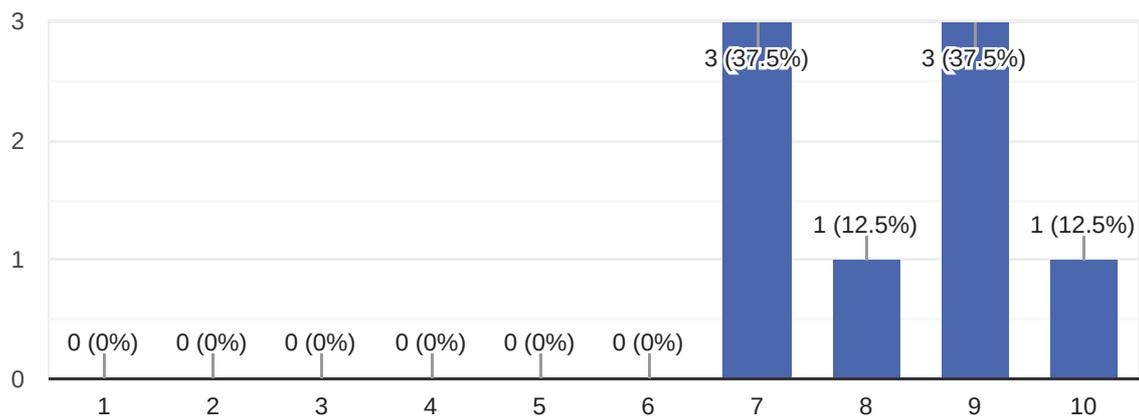

Excellent traîner

a l'écoute des questions et pertinent sur les réponses. Très bonne maitrise du sujet

How did the course meet your learning objectives?

Très bonne présentation pour un débutant comme moi

Perfect for Linux part, not enough "embedded oriented"

What part(s) of the course did you like most?

6 responses

All the lectures and the projects in the practical labs

Labs where we can applied what we learned

Labs

The labs haha

les labs

Buildroot

What part(s) of the course did you like least?

2 responses

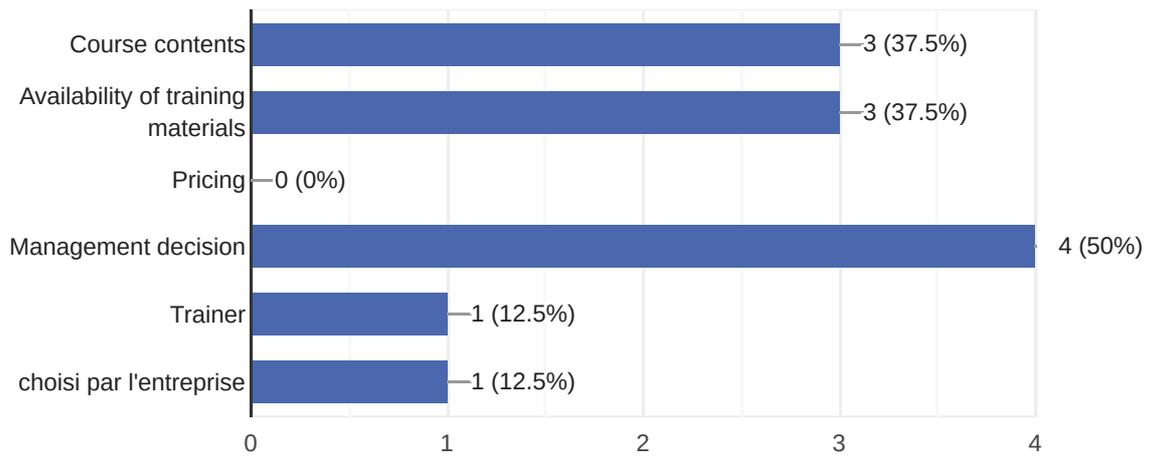

The organization of the practical labs

License

What reasons prompted you to choose a Bootlin course?
