If you explain with block diagrams and drawing it will be great.

Course is but lectures was too long. Lecture should be 1 to 1.5 hours.

the tutor pace was strong fascinating this could be slow for some one who is not a

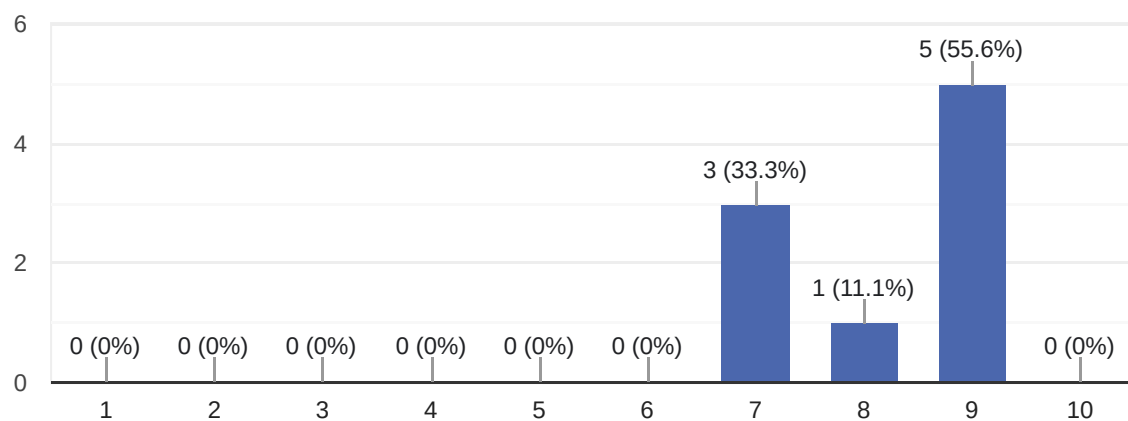

Some topics were very far end . I guess there should be some block diagrams and more practical implementations may be i feel it because of online. But overall our trainer is so good he explained everything very well.

overall it was good course. my suggestion is to add more diagrams; then it will be perfect

How useful were the lectures?

Good

As an embedded linux engineer almost everything was worth learning.

What part(s) of the course did you like most?

4 responses

Driver development

practical labs and trainer technical knowledge

I can't figure out the only part .

I like kernel configuration part

What part(s) of the course did you like least?

3 responses

Start of course

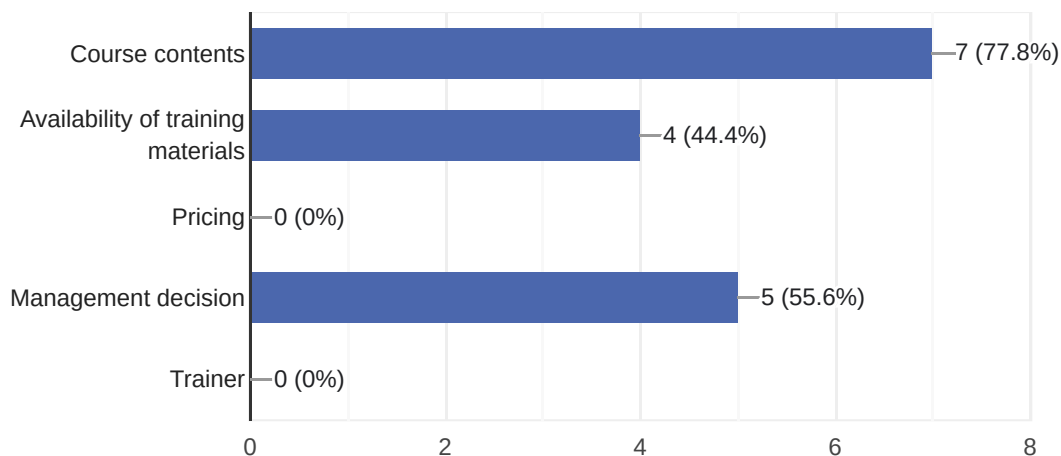

DMA and it's lab :(

i least like hardware part because i am new to hardware

What reasons prompted you to choose a Bootlin course?

Thankyou so much Bootlin and its all members for arranging such a valuable course.

Further training needs?

2 responses

In future I require the customize course specially on xilinx platforms or any other fpga socs

May be all yocto based , security, etc.
