I more modern platform to do the lab practice would be helpful. We did not buy the recommended dev kit because it would be a onetime usage and forget.

Overall, the training was very good. Labs were interesting, but from my point of view scarce. I'd prefer to have more hands-on sessions instead of tons of slides.

How useful were the lectures?

Most of the presenters at Bootlin are legends in the Linux kernel scene. However, I think you guys needs to contact a pedagogical service to help Bootlin courses to improve significantly regarding how technical stuff can be taught and convert it in an learning experience of excellence.

How would you rate the trainer?

excellent training. Maxime is very knowledgeable and explains very well.

I'm very grateful for the opportunity to learn from Maxime Chevallier.

Further training needs?

1 response

device drivers and u-boot
